

Two Tenure-track Faculty Positions in Earth Sciences

Academia Sinica is the premier, state-funded research organization in Taiwan. The Institute of Earth Sciences (IES), one of the 31 institutes of Academia Sinica, has strong and active research programs in solid Earth geophysics and geochemistry with state-of-the-art analytical and computational facilities. The institute also operates several field observation networks in Taiwan and other parts of Asia. Current research in IES includes observational and computational seismology, isotope geochemistry and cosmochemistry, active tectonics and geohazards, orogenic processes and crustal evolution, gravity and geomagnetic analysis, and geodynamics and physical properties of deep Earth. We invite outstanding candidates to apply for two tenure-track faculty positions at all levels. The positions are open to all research areas that strengthen or complement the aforementioned fields at IES. We especially encourage applicants with expertise in low-temperature geochemistry and Earth and planetary geodynamics to apply. Candidates must have a Ph.D. degree and an excellent record of independent research. Interested applicants please send a curriculum vitae including a full list of publications, three or more names of references (with affiliation and contact information), and a research plan to shewen@gate.sinica.edu.tw. Review of the applications will begin on November 1, 2018, and continue until the positions are filled. For more information about IES, please visit <http://www.earth.sinica.edu.tw>.
