Multiple Tenure-track Faculty Positions in Earth Sciences

Academia Sinica is the premier, state-funded research organization in Taiwan. The Institute of Earth Sciences (IES), one of the 31 institutes of Academia Sinica, has strong and active research programs in solid-Earth geophysics and geochemistry with state-of-the-art analytical and computational facilities. The institute also operates several field observation networks in Taiwan and other parts of Asia. Current research in IES includes seismological and geodetic studies, regional and global tectonics, geodynamics, gravity and geomagnetic analysis, high pressure mineral physics, isotope geochemistry, orogeny, igneous and metamorphic petrology, cosmochemistry, and marine geochemistry. We invite outstanding candidates to apply for several tenure-track faculty positions at all levels of seniority. The positions are open to all research areas that strengthen or complement the aforementioned fields, and we especially encourage applicants with expertise in geochemistry, mineral physics, and tectonics. Candidates must have a Ph.D. degree and an excellent record of independent research. Interested applicants please send a curriculum vitae including a full list of publications, three or more names of references (with affiliation and contact information), and a research plan to shewen@gate.sinica.edu.tw. Review of the applications will begin on October 1, 2017, and continue until the positions are filled. For more detailed information about IES, please visit <http://www.earth.sinica.edu.tw>.
