

2010 年 8 月 31 日

江博明特聘研究員榮退學術研討會

中央研究院地球科學研究所二樓演講廳

會議議程

主持人:趙丰		
0930-0940	俞震甫	江博明特聘研究員學術生涯簡介
0940-1010	來賓致詞	李遠哲院長、劉兆漢副院長、 陳正宏副主委
1010-1020	榮退感言	
1020-1030	攝影留念	
主持人:黃柏壽		
1030-1100	江博明	Accretionary Orogen and Evolution of the Japanese Islands – Implications from a Sr-Nd isotopic study of the Phanerozoic granitoids from SW Japan
主持人:陳中華		
1100-1115	李太楓	A surprisingly non-uniform distribution of a rare nuclear component from supernovae in early solar system planetary scale magmas
1115-1130	鍾孫霖	A comparative study of the Caucasus/Iran and Tibet/Himalaya orogenic belts
1130-1145	王國龍	Existence of Microcontinent in the Central Asia Orogenic Belt: In Situ Re-Os Evidence from the Lithospheric Mantle
1145-1200	謝奈特	A triumvirate of Fe-Ti oxide bearing gabbro-granitoid complexes in the Panxi region of the Permian Emeishan large igneous province, SW China
1200-1215	李昭興	Mesozoic tectonic structure in the East China Sea
主持人:李建成		
1400-1415	李德春	The evolution of Cd isotopes in the oceans
1415-1430	汪中和	An essential ocean thermostat: the cooling role of El Niño and La Niña during the recent global warming
1430-1445	陳華玟	Neotectonics vs. Eustatic Forcing in the Late Quaternary Sedimentary Records of Changhua Coastal Plain, Central Taiwan Forland Basin
1445-1500	陳柔妃	Geomorphological applications of In-situ cosmogenic exposure dating in active deformation front, western Taiwan
1500-1515	張國楨	Geological, neotectonic mapping and morphotectonic analysis by means of LiDAR data: example of central Coastal Range, Eastern Taiwan

1515-1530	詹瑜璋	Upward Extrusion Associated with Surface Normal Faulting and Deep Duplex Shearing in the TaiwanMountain Belt
1530-1600	coffee time	
主持人:林正洪		
1600-1615	張儒媛	Origin and metamorphic evolution of Grt-clinopyroxenitefrom the Sulu UHP terrane, China: evidence from microstructure and composition of mineral
1615-1630	蔡金河	Metamorphic evolution of garnet-bearing metaclasticsand metagranitoids in the Hoping-Aohua area, TananaoComplex, Taiwan
1630-1645	洪崇勝	磁黃鐵礦 (pyrrhotite)：一個指示低度變質相與造山剝蝕作用之指標礦物
1645-1700	黃柏壽	A proposed seismic array surrounding the South China Sea and its potential scientific achievement
1700-1715	邱宏智	Strong ground motion caused moderate damage in the Chi-Chi earthquake
1715-1730	李憲忠	Numerical simulations of source processes and seismic wave propagation associated with hazardous earthquakes in Taiwan
Poster		
I	王乾盈	南北縱貫宜蘭平原高解析震測大剖面
II	陳國誠 王錦華	Correlations between the Mainshock and the Largest Aftershock for Taiwan Earthquakes
III	趙里	Surface-wave phase and group velocities across southern Taiwan
IV	盧佳遇	The paradox of an ocean-dipping Benioff zone - example from Taiwan
V	扈治安	Source-to-sink pathways of sediments in the Taiwan Strait: A multi-tracer approach
VI	藍晶瑩	Geochemical and isotopic studies of mafic-ultramaficcomplex, NE Vietnam
VII	俞震甫	Genesis of jadeitite: a case study from Guatemala
VIII	翟慶國	Triassic eclogite from central Qiangtang, northern Tibet: implication for the closure of the Paleo-Tethys Ocean
IX	翟慶國	Paleozoic ophiolitic mélange from central Qiangtang, Northern Tibet
X	邵文佑 陳文山 鍾孫霖	奇美火成雜岩的鋯石鈾鉛定年?

參與者請提早至會場準備幻燈片與張貼壁報。
