

劉 忠 智 客座專家
Liu, Chun-Chi Visiting Specialist

TEL : +886-2-2783-9910 ext. 1318
FAX : +886-2-2783-9871
E-mail : ccliu@earth.sinica.edu.tw

研究領域：地震儀器、遙記式地震觀測網
Specialty: Seismic Instrumentation, Seismic Telemetry System

[學 歷 Education]

- 1979 : 台灣科技大學 學士
B. A ., 1979 , Electronic Engineering, National Taiwan University of Science and Technology

[經 歷 Experiences]

- 1976 - 1980 : 中研院地球所技佐 Electronic Technician, IES-Academia Sinica
- 1980 - 1985 : 技士 Electronic Technician, IES-Academia Sinica
- 1985 - 1992 : 荐任技正 Electronic Engineer
- 1992 - 2003 : 簡任技正 Electronic Engineer
- 2003 - 2017 : 研究技師 Research Scientist
- 2017 - : 客座專家 Visiting Specialist

[榮 譽 Honor]

- 救國團青年獎章 (1981)
- 行政院傑出科技榮譽獎 (1982)
- 交通部研究成果優等獎 (1993)

[Training]

- Instrumentation for Seismic Research Observatory, Albuquerque Seismological Laboratory, USGS, 1975.
- Instrumentation for SMA-1, SMA-2 Strong-motion Accelerographs, Kinematics Inc., 1975, 1982.
- 3-year MBA program for high-tech enterprises, Dept. of Business Administration, NCU, 1990-1993.
- Evaluation and testing of strong-motion accelerographs, USGS, 1993.
- Database and instrumentation for portable array, PASSCAL Instrument Center, IRIS, 1999.
- Dynamic Signal Analyzer, VAX/VMS System Management, VAX RDB/VMS Design, Labview and others.

[Engineering Contributions]

I. Network deployment and operation

Lead a team to install, maintain and operate the instruments for:

1. Taiwan telemetered Seismographic Network (**TTSN**). 1973-1992.

2. The **TATO** station of Seismic Research Observatory (1976-1992), and Global Seismograph Network (1992- Present), in cooperation with Albuquerque Seismological Laboratory of USGS.
3. Strong Motion Accelerograph Array in Taiwan, Phase 1 (**SMART-1**), a cooperation program between University of California at Berkeley and Institute of Earth Sciences, 1980-1990.
4. Strong Motion Accelerograph Array in Taiwan, Phase 2 (**SMART-2**), 1990 - Present.
5. Lotung Large Scale Seismic Test Array (**LSST**), 1985-1990, and Hualien Large Scale Seismic Test Array (**HLSST**), 1993-2002.
6. Onshore/offshore wide-angle deep seismic profiling in Taiwan, 1994.
7. Tatunshan Micro-earthquake Monitoring Network, 1995-2001.
8. Strong Motion Downhole Array in Taipei Basin, 1994 - Present.
9. Broadband Array in Taiwan for Seismology (**BATS**), 1995 - Present.

II. Seismic system development

1. Developed a computerized seismic monitoring system for Taiwan telemetered Seismographic Network (1988). The system consisted of a 64-channels A/D converter, a PDP-11/70 minicomputer, and a Micro-VAX workstation. Several tasks, such as data acquisition, event detection, automatic location and data reduction could be concurrently performed on the system.
2. Developed the data acquisition system for retrieving the seismic data from the SDP system of CWB's short period seismic network (1993). Using X-terminal, event location and its related waveform data, can be displayed and accessed by any user with local area network.
3. Implemented the telemetered data acquisition system for the **BATS**, 2000.
4. Implemented a system based on Earthworm software for CWB's broadband network, 2002.
5. Implemented an Earthworm system for BATS to exchange the realtime data between IES and CWB, 2003.

III. Instruments and PC-Based data acquisition system development

1. Designed the amplifiers and filters for Taipei Basin research project, 1976.
2. Designed the interface circuit for G826A proton magnetometer, 1980.
3. Developed the signal condition box for the strong-motion building array, 1992.
4. Developed the data acquisition system for the Large Scale Seismic Test Program in Hualien. The system used IEEE-488 controller and three 16-bit, 64-channel A/D converters to record the signal from accelerometers and pressure transducers. The recorded data had been applied to structure response and soil-structure interaction research, 1993.
5. Developed the automatic testing and calibration system for force balance accelerometer, 1994.
6. Developed the data acquisition system to upgrade existing PANDA-II data acquisition system. The system was developed on a Windows-2000 platform, used IASPEI Software Library and virtual instrument technology to record the real time data from PANDA-II telemetered system, 2000.
7. Designed and implemented a new prototype type data acquisition system for the strong-motion building array. The Labview and PCI-6033E data acquisition board from the National instruments and the IASPEI software library were used to create this application, 2003.

IV. Technical service

1. Seismological Instrument Service Program, National Science Council, 1989-1992.
2. Evaluate the strong motion accelerographs for CWB's **TMSIP** program, 1992-Present.
3. Assisted CWB to setup broadband seismic network, 2001-2002.
4. Implemented a PC-based seismic data acquisition system for Hong Kong Observatory, 2002.
5. Developed the software for quickly and easily review, extract and convert huge amount data stream from different 24-bit data recorders, such as SMATAC-801H (Tokyo Sokushin), DL-24 (Geotech) and Q330 (Quanterra), 2003.
