PostDoc and Research Assistant positions for seismic waveform analyses.

Dr. Wu-Cheng Chi's lab is hiring a postdoctoral fellow (starting August, 2023) and a research assistant (starting Jan, 2023). Our lab conduct arrayed seismic waveform analyses and inversions to study natural and man-made sources that excite seismic and acoustic waves, in order to reduce natural hazard and for new energy.

Qualifications

Training in science or engineering. Interested in python and linux. Interested in active- or passive-source seismology.

Our small lab enjoy close interaction with members from Europe and Asia. These two advertised positions will not need to do fieldwork or go on research cruises.

We will start to evaluate the applications now, until the positions are filled.

Contact: Dr. Wu-Cheng Chi. wchi@sinica.edu.tw
